

Magnetic Thermocouples are used to measure the surface temperature of ferrous material any magnetic object. These are ideal for applications where quick removal is desired or modifying the surface is not permitted. Magnet thermocouples are spring loaded,

available with grounded or ungrounded flat tip construction. Temperature is limited to the holding power of the magnet approximately 400°F.

- Magnet Dimension (H) x (W) x (D) : 25 x 38 x 25 (mm)
- Type Available : K, J, T, E
- Heavy Duty, Grounded
- Measures Surface Temperature of Ferrous Materials
- Magnetic Spring Mounted
- Single or Dual Pull Magnet
- Stainless Steel Braid Wire
- Max Temperature : Up to 400°C
- Optional : Thermocouple Connectors
