duraRTD

For High Vibration Applications where normal RTD's tend to fail, Tempsens has brought its new in line Vibration resistant RTD series - duraRTD. duraRTD uses a special ceramic bonding agent which resists up to 80% of the vibrations from reaching the RTD element. This ensures longer stability and higher mechanical strength which reflects as longer life of the sensor.

BOGIE OVEN

Bogie Ovens are used where heat treatment of heavy goods are required. In this type of ovens there is one shuttle in the bottom which will move in and out inside the inner chamber of the oven. Bottom side of the oven, bogie arrangement is made for loading the GT wheels.

Applications

- Annealing
- Hardening
- Tempering
- Heat Treatment

- Preheating
