NEW PRODUCT

IR - CAST 2C+

It is a highly accurate digital two color **rectangular measuring field** IR pyrometer for non contact temperature measurement specially used in foundries for molten metal. The Pyrometer measures the temperature of an object by calculating the ratio of energies at two different wavelength. The ratio technique eliminates and reduces errors in temperature measurement caused by factors such as dust, vapour or smoke etc.

Fire Survival Cable

For making the cable safe from fire, we improve the properties of cable **insulation & jacket** and try and ensure self-extinguishing compounds, which even if there is external fire, they will not propagate the flames **and remains the power supply under fire condition for a certain time.**
